

Event OS

Put the right information in front of every worker. Smart visual communication for factories, plants, and warehouses.

| The Shop Floor Connection Gap

Invisible Data

Critical info often stays trapped in office spreadsheets or whiteboard scribbles that workers rarely see in real-time.

Safety Risks

Safety notices and accident counters are often outdated or placed where they aren't easily noticed by the team.

Direct Office Control

Update screens from your own PC. Event OS displays your factory information on TV screens without creating new data.

It shows the information your team already has in a way that everyone can see and understand immediately.

| Simple. Powerful. Offline.

One PC Control

Manage all screens across your facility from a single workstation.

Local Network

No internet required. Runs entirely on your local plant network.

Unlimited TVs

Broadcast your message to standard TVs located anywhere in the plant.

| At The Main Gate

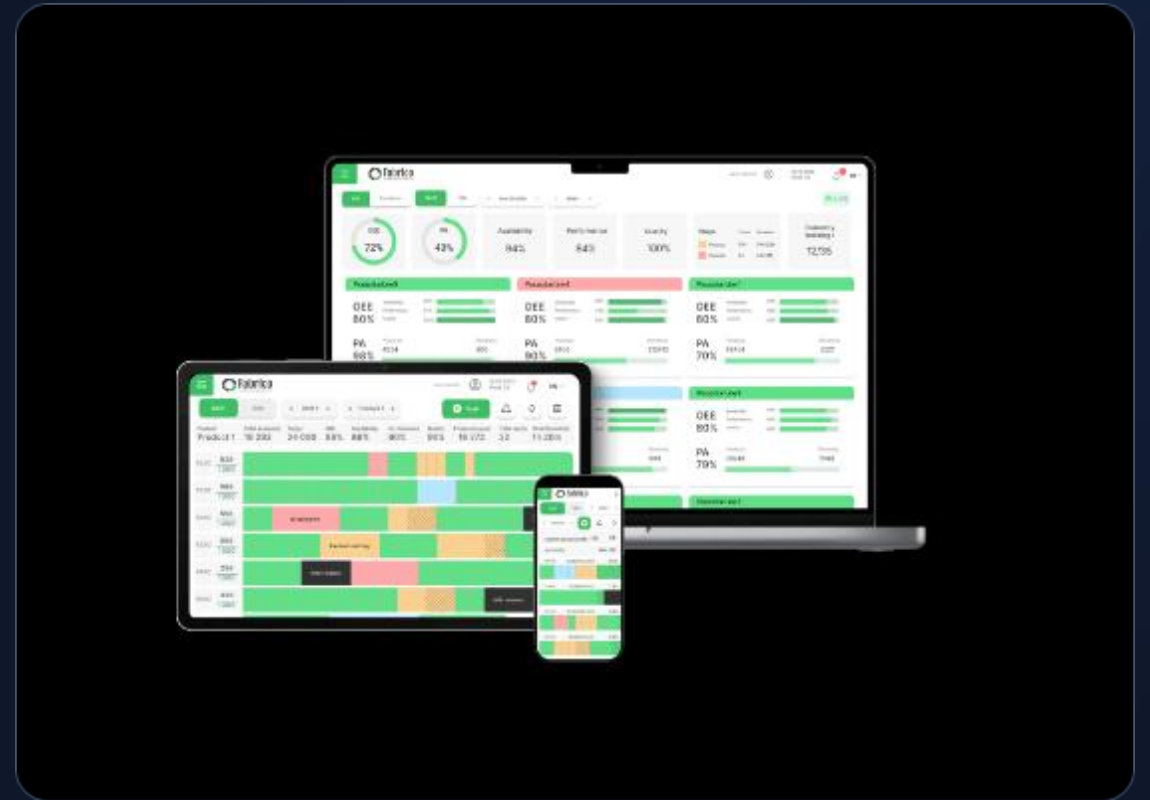

Safety first, every single day.

Display live accident-free counters to build a culture of safety. Remind workers of PPE requirements before they enter the floor.

 Real-time accident counters

 Daily safety reminders

 Welcome & shift updates

In Production Areas

Make targets visible to everyone.

When teams see their progress live, engagement increases. Event OS turns dry numbers into visual motivation.

 Daily target vs. actual output

 Real-time progress bars

 Truck & Loading queues

| In The Staff Canteen

Notices workers actually notice.

Reach your staff during breaks. Replace dusty notice boards with dynamic digital announcements.

Meeting announcements

Employee recognition

Emergency alerts

| Why Plants Choose Event OS

- ✓ **Unified Information:** Less confusion between departments as everyone sees the same live data.
- ⚡ **Faster Reaction:** Problems become visible earlier, allowing teams to react before targets are missed.
- 👤 **Habitual Safety:** Continuous visibility ensures that safety stays front-of-mind for every worker.
- 📺 **Low Cost:** No expensive new systems; we use your existing information and standard TVs.

| The Power of Visual Visibility

**Data shows post-implementation improvement in worker information accessibility.*

| Simplified Implementation

No Special Skills

Everyday staff can update approved information easily. If you can use a basic PC, you can master Event OS in minutes.

Hardware Friendly

In most cases, you won't need new TVs or complex IT infrastructure. We first check what you already have available.

See it in your factory.

Book a **FREE 30-minute demonstration**. We come to your plant, set up a screen, and show how **your own information** looks live.
